

UBC, Geography 419: Research in Environmental Geography.

David Brownstein.

Annotated Bibliography Guidelines.

Due online, before class starts on **February 2, 2015**. This bibliography is worth 30% of your final grade. Please aim to evaluate a minimum of 15 peer reviewed sources.

Begin your bibliography with an updated or revised thesis or problem statement, incorporating my comments from your original proposal.

An annotated bibliography gives an account of the research that has already been undertaken on a given topic. Make this webpage your first stop:

<http://www.writing.utoronto.ca/advice/specific-types-of-writing/annotated-bibliography>

Having selected a topic with your community partner, you are now ready to educate yourself about the issue in depth and evaluate what others have already written about it. Your task here is to identify references that will help you to write your paper. The most recent works will appear in the journal literature, but books and government reports will also be helpful. You may use internet sources in the very early stages of research but please do not include any of those in your bibliography (we will discuss the reasons for this in class). Locate a set of sources in the library and select a wide range providing a variety of perspectives. Electronic versions of journal articles are not considered websites for the purposes of the assignment.

Your bibliography will consist of a reference list. Each citation will be followed by a summary and appraisal (five to eight sentences would be a good start). The citation can be in any of the accepted academic formats, but please choose one and be consistent. Each annotation should include, at a minimum:

- how the work gives you insight into your topic
- the authority or disciplinary background of the author (ie, geographer, planner)
- the intended audience of the work
- a summary of the work's argument, methods, and conclusions (include strengths and weaknesses)
- biases, reliability of the source via sources they used, how they arrived at their conclusions and
- a comparison with some of your other sources.

Ideally you won't have to do much more library research after compiling this bibliography, and the sources that you uncover and evaluate will be sufficient to write your final report.
